DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

A first embodiment for calculating a ratio of an actual time interval to a predetermined time interval, as best illustrated in paragraph 0031, lines 6-11.

A second embodiment for calculating a ratio of an actual time interval to a predetermined time interval, as best illustrated in paragraph 0031, lines 11-18.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

3. Currently, claims 5 and 22 are considered to be generic with respect to these species.

4. This application also contains claims directed to the further patentably distinct species of the claimed invention:

A first embodiment for using a compensation value to reduce a difference between a count value and a threshold value, as best illustrated in paragraph 0032, lines 4-8.

A second embodiment for using a compensation value to reduce a difference

between a count value and a threshold value, as best illustrated in paragraph 0032, lines 9-15.

A third embodiment for using a compensation value to reduce a difference between a count value and a threshold value, as best illustrated in paragraph 0032, lines 15-17.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. Currently, claims 1 and 18 are considered to be generic with respect to these species.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141.

Art Unit: 2857

If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. A telephone call was made to Mr. Winston Hsu on September 28, 2005, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. West whose telephone number is (571)272-2226. The examiner can normally be reached on Monday through Friday, 8:00-4:30.

Art Unit: 2857

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S. Hoff can be reached on (571)272-2216. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
